I'm Soham Raj Chopra, a competitive programmer and web developer currently studying in 3rd year at IIIT Bhagalpur . I specialize in both frontend and backend technologies. I build engaging and responsive websites using HTML, CSS, JS, Django, Django-Rest.

Work Experience

Projects

Blogging Website

Present

Created a dynamic blog using Django, HTML, CSS, and JavaScript. Integrated Google Sign-In for authentication and implemented full CRUD functionality. Deployed on PythonAnywhere for reliable access and performance.

Weather Website

Present

Developed a weather site using Django, HTML, CSS, and JavaScript to fetch real-time data from APIs. Designed a responsive UI and deployed the application on PythonAnywhere for consistent and reliable performance.
