Education

- Indian Institute of Information Technology** 2022-2026
B.Tech Computer Science & Engineering / Relevant Coursework: Cloud Computing, Distributed Systems CGPA: 7.8
- Pioneer Convent School, Indore** 2022
CBSE - Physics, Chemistry, Mathematics, Computer Science Percentage: 90

Technical Skills

Languages: C/C++, Python, JavaScript (ES6+), SQL
Web Technologies: Django, REST APIs, WebSocket, JWT, HTML5/CSS3
Cloud & DevOps: Azure (Fundamentals Certified), Docker, CI/CD Pipelines
Databases: PostgreSQL, Neon Serverless DB, Redis, ORM Optimization
Tools: Git/GitHub, Postman, Swagger, JIRA, Agile Methodology
Soft Skills: Cross-functional Collaboration, Technical Documentation, SCRUM Leadership

Professional Experience

- Radixlink India Pvt. Ltd.** Jan 2025
Backend Developer (Django) Remote
 - Architected 15+ REST APIs using Django REST Framework, achieving 95% endpoint reliability
 - Reduced API latency by 35% through query optimization and caching implementation
 - Containerized 3 microservices using Docker, decreasing deployment time by 40%
 - Collaborated with frontend developers to implement API's efficiently.

Technical Projects

- VerveVista - Collaborative Publishing Platform** Django | WebSocket | Neon DB | Google OAuth Feb 2024
Full-stack blog engine with real-time editing features
 - Built real-time collaborative editor using WebSocket, supporting 50+ concurrent users with minimal lag
 - Implemented Google OAuth for secure and frictionless user authentication
 - Deployed using CI/CD pipelines, reducing production rollback incidents by 60%
 - Leveraged Neon serverless DB for auto-scaling storage, ensuring consistent performance during traffic spikes managing traffic better by 20%.
- WeatherApp: Analytics Engine** Python | REST API | JSON Parsing Dec 2023
Web-based tool for real-time weather tracking and API integration practice
 - Integrated 3 public weather APIs to compare real-time data and understand response structuring
 - Parsed and displayed key weather metrics like temperature, humidity, and wind speed in a user-friendly Web format
 - Enhanced API handling efficiency with retry logic, exception management, and request optimization techniques
- C++ Utility Apps – Game & Productivity Tools** C++ | Console-Based Applications Dec 2023
C++ apps enhancing logic, performance, and productivity via the command line
 - Built a terminal-based Tic Tac Toe game with AI opponent using Minimax algorithm, improving win prediction accuracy by 80%
 - Developed a task management CLI tool supporting deadlines, priority sorting, and persistent storage via text-based serialization
 - Optimized CLI interaction flow, reducing average user task management time by 50% compared to basic shell-based alternatives

Leadership & Achievements

- National Level Chess Competitor** Participated in U-13 National Chess Championship Gujrat 2016
